DETAILED ACTION

Allowable Subject Matter

1. Claims 1-12 have been allowed.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance:

The closest prior art of record fails to teach or suggest each and every feature of the present invention for a radio frequency tuner for analogically and digitally modulated signals, comprising: a tuner arrangement for converting any selected one of analog and digital channels to one of baseband and zero intermediate frequency analog quadrature signals; a low pass filter for filtering out the selected channel from said analog quadrature signals, the low pass filter attenuating a first channel adjacent to the selected channel, the low pass filter attenuating a second channel at an aliasing frequency of the selected channel, the low pass filter correcting imbalances based on a feedback signal, and the low pass filter being a quadrature anti-alias filter; a dual analog-digital converter for converting said analog quadrature signals to digital quadrature signals, and a digital signal processor coupled with the low pass filter for processing said digital quadrature signals, said processing including performing channel filtering to pass said selected channel and substantially to reject other channel signals, said processor providing the feedback signal to the low pass filter as required by claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
